In his opening remarks, Shri Khangarot stated that just as UPNEDA had endorsed the earlier rooftop solar scheme, now when the Government of India has identified the DISCOMs as the implementing agencies for the phase-II programme it again endorse and promote this scheme; Shri Khangarot thanked Smt Dubey for her efforts in bringing about a shift in the mindset and the mobilisation of the DISCOM officials.

During the meeting, there were extensive discussions on the challenges and pending actions of the rooftop solar applications that are yet to be undertaken by DISCOMs. Additionally, the administrative requirements highlighted by MNRE for successful implementation of the scheme like Project Completion Report submission, PFMS account opening, use of SPIN portal and its integration were also highlighted by the EU-India Technical Cooperation Project: Energy.

Smt Dubey encouraged the nodal officers of DISCOMs to proactively participate in the implementation of the scheme and to provide regular updates on the progress of the Phase II scheme implementation within their jurisdiction.
